

# ZERUST® Corrosion Solutions

## Zerust® Motobag

Protect your valuable motorcycle from corrosion and oxidation  
**easily and efficiently**

with **Zerust®** rust preventative Motorcycle cover bag.  
**Zerust®** cover bag is suitable for protecting snowmobiles, too.

- Zerust Motobag inhibits corrosion from spreading and forming on metal surfaces.
  - Zerust Motobag is easy to use and durable.
  - Zerust Motobag keeps its effectiveness for a long time.
- Zerust is a well-known and approved corrosion protection method which is widely used by metal and automotive industries around the world.

---

**Worldwide Corrosion Prevention**

### What is Zerust?

Zerust is a VCI (Vapor Corrosion Inhibitor). The patented chemical Zerust formulation emits an invisible, odorless vapor which protects metal surfaces to keep rust and corrosion from forming. The Zerust molecules are incorporated in the Motobag. Zerust is safe for health and environment.

### How Zerust Motobag works?

The Zerust components present on the surface of the metal suppress corrosion in three ways:

1. They passivate the electron flow between the high and low energy areas on the surface of the metal.
2. They form a layer that prevents moisture and impurities directly contacting the metal.
3. They regulate the PH value on the possible moisture layer on the surface of the metal.

### How to use Zerust Motobag?

1. Thoroughly clean and dry your vehicle according to the manufacturers recommendations (check owner's manual). Your bike should be cooled down to room temperature before closing it into the Motobag.
2. Follow carefully the instructions below, and you'll get the best possible protection against rust and corrosion.
3. Motorcycle that is protected with Zerust Motobag can be stored even in cool and humid storage conditions.

1 Place Motobag on a flat surface and unzip the bag completely. The side with Zerust logo imprinted should be facing up.

2 Roll your vehicle down the center of the bag, and carefully rest your bike on the kickstand.

3 Cover the motorcycle with Motobag.

4 Make sure that the motorcycle is entirely covered with the protective bag. Carefully zip the enclosure.

5 Your motorcycle is now protected from corrosion as well as from dust and water during storage.

### Post storage period:

- Store Motobag inside the carrying case that came with the container
- Store the bag zippers closed.
- Store the case in a cool, dry place away from direct sunlight.
- Your Zerust Motobag if handled and used correctly, will provide maximum protection for 5 years from the date of first use.

### Zerust Motobag is perfect for protecting snowmobiles, too!
